EDUCATION

University of Notre Dame

Bachelor of Arts in Computer Science, Double Major in Economics

Notre Dame, IN

Aug. 2023 – May 2027

EXPERIENCE

Founding Software Engineer

Athena (Acquired for \$X Million)

May 2024 – Dec. 2025

Mountain View, CA

- Developed a data pipeline using Python and OpenAI's API that **reduced essay transcription time by 10x**
- Shipped an email verification feature using Django and React which **reduced new account fraud by 5x**
- Built knowledge bases and used retrieval augmented generation (RAG) to support 10 unique models
- Led new social media content strategy which garnered 200k+ views and increased daily active users by 50%
- Led all consumer app operations up until acquisition; managed a team of 8

Deals Technology Intern

PricewaterhouseCoopers (PwC)

June 2026 – Aug. 2026

San Jose, CA

- Shipped several features to a production app on Databricks for an F500 client, deploying via Azure DevOps CI/CD
- Replaced a binary risk classifier with a piecewise-linear scoring function, cutting overstated revenue-at-risk exposure by **\$51 million (18%)** across 300 service areas

Technology and Data Solutions Intern

PricewaterhouseCoopers (PwC)

June 2025 – Aug. 2025

San Jose, CA

- Led a pro-bono project for a career-readiness client serving 7M+ users and 190k+ professionals
- Modeled AI adoption scenarios in Python with Monte Carlo simulation, estimating **2x revenue/employee**

Product Management Extern

Amazon

Jan. 2024 – April 2024

Boston, MA

- Conducted user surveys and A/B tests to uncover key pain points, presented to Amazon leadership

PROJECTS

Down to Split | Next.js, TypeScript, Supabase, PostgreSQL, Vitest

July 2026 – Present

- Web app that helps students split the cost of airport rides with classmates, with seat and luggage availability syncing live across riders via Supabase Realtime; live at [downtosplit.app](#)

Log15 | Tauri, Rust, React, TypeScript, SQLite, Recharts

Jan. 2026 – Present

- Desktop productivity tracker that prompts users every 15 minutes to log their work; in beta testing with users

OAPacks

Aug. 2023 – Dec. 2025

- Bootstrapped a sports nutrition startup to \$625 in first-week revenue via door-to-door sales; advanced in Notre Dame's McCloskey Startup Competition as the only freshman-led team among 180 entrants

OAREcs | Next.js, TypeScript, FastAPI, Python, PyTorch, Chroma

May 2025 – Aug. 2025

- Recommendation engine to create personalized nutrition packs for OAPacks customers; live at [oa-recs.vercel.app](#)

SQL Chat | TypeScript, Tailwind, PostgreSQL, Git, Docker

Feb. 2025 – May 2025

- Optimized an AI-powered open-source database tool for a local company, cutting query latency in half
- Deployed a production instance in Docker on a company VM

TECHNICAL SKILLS

Languages: Python, Java, C/C++, TypeScript, JavaScript, Rust, Swift, SQL (PostgreSQL, SQLite)

Frameworks & Libraries: React, Next.js/Node.js, FastAPI, Django, Tauri, SwiftUI, pandas, NumPy, PyTorch

Tools: Docker, Supabase, Vercel, OpenAI API

LEADERSHIP AND HONORS

- 4-Year Student Body President at Longmeadow HS (raised \$20,000+ in class funds)
- Team Captain of Oakwood Soccer MLS Next (top 0.1% of youth soccer players)
- Massachusetts All-State Band Trumpet Player
